BASIL MEER

WEB DEVELOPER

———

I am a self-taught, self-motivated individual driven by my passion to improve and learn new skills while putting them to good practical use to make the most of what I learn. Always on the lookout for new opportunities, I do my best to stay up-to-date with modern technologies and experiment with them in off-work hours.

Having worked with a startup, I am accustomed to using a proper version control software in projects while keeping the pipeline clean and uncongested, while keeping a tab on a project's pace. Furthermore, my skills are not only restricted to programming but also branch out to graphics designing and a bit of content writing on the side, as well.

EXPERIENCE

Graphic Designer　　　　　　　Nov 2016 – Mar 2017
InnoverseTech – Lahore, Pakistan
As a graphics designer, my responsibilities included designing graphical content for our clients which often alternated between digital media and print media.

Front-End Developer　　　　　　Mar 2017 – Mar 2018
Hobuddies (Pvt) Ltd. – Lahore, Pakistan
Hobuddies is a speed-networking, social media platform that matches its users with like-minded people on the basis of their interests.

As a front-end developer, my responsibilities included designing the application's user-interface while promoting a positive user experience. Furthermore, I also contributed by designing all relevant graphical resources ranging from the logo to wallpapers and posters.
